

## ECO-SCHOOLS worksheet

PART 1 (audio 1)

1- Schools in the UK spendings : listen and tick the spendings mentioned in the recording

- |  |   |
|--|---|
| <input type="checkbox"/> clearing litter | <input type="checkbox"/> internet connections     |
| <input type="checkbox"/> detergents      | <input type="checkbox"/> paper and stationary     |
| <input type="checkbox"/> electricity     | <input type="checkbox"/> pesticides and chemicals |
| <input type="checkbox"/> emptying bins   | <input type="checkbox"/> preventing vandalism     |
| <input type="checkbox"/> food            | <input type="checkbox"/> salaries                 |
| <input type="checkbox"/> furniture       | <input type="checkbox"/> water                    |

2- Find the correct answer

- eco -schools spend less money than other schools and help protect the environment
- eco-schools spend more money than other schools but help protect the environment
- eco-schools spend as much money as other schools but help protect the environment

3- Which of the following statements are actually mentioned in the recording. Tick them

- there is less violence in eco-schools
- students are less tired when they work in eco-schools
- students have less eating disorders in eco-schools
- students have better results
- there is less absenteeism in eco-schools

4- Listen to part 1 again and write the sums of money saved next to the spendings mentioned in ex.1

5- Read the script and be able to justify your answer from ex 2 and 3

6- Vocabulary: Match words with their synonyms (video-projector activity) and write them down in your notebook

PART 2 (audio 2)

7- Read the script and circle the appropriate words in bold letters. Listen and check your answers

Here's a closer look at what eco-schools can **achieve** / **a chief**

Litter: by encouraging children to dispose of their litter properly, local authorities can save thousands of **sounds** / **pounds** spent cleansing **key-roads**/ **key-roots** to schools

Water: simply **turning on/ turning off** taps, stopping leaks and reducing water **using** / **use in** toilets can help save an average school around **5000/ 500** pounds in just a year

Energy: by 2008, every school and public building in the country will have to display their energy ratings **by law** / **buy low**. Eco schools help you get one step ahead by assessing the energy rating of your school, cutting **full bills/ fuel-bills** by **10 000 / 10 %** and reducing CO2 **emissions/ and missions**.

Waste: minimizing waste and encouraging recycling helps schools **safe/save** money, helps councils meet domestic recycling targets and helps to **inspire/ expire** the community to reduce their waste.

Transport: **peoples/pupils** in eco-schools are more likely to **walk/ talk** to school or find sustainable ways of traveling, helping to reduce their **card on / carbon** footprints and improve their **health/ hells**.

Healthy living: eco-schools encourages **children/ a child and** to adopt a healthy lifestyle, a fundamental aspect of every child **manners/ matters** which aims to provide all children with everything they need to stay healthy.

8- Listen and fill in the blanks

Eco-schools have already been adopted by \_\_\_\_\_ of schools in England with more and more joining everyday. Over \_\_\_\_\_ schools across the world in more than \_\_\_\_\_ countries including \_\_\_\_\_, \_\_\_\_\_ and Maroco have also become eco-schools and remember, joining eco-schools is absolutely free so whether you're a school, local authority, NGO or business, do something today and \_\_\_\_\_ making a change
